Prime and Feeding Heifers, Cows and Bulls

Consignors should note that the market is demanding that Prime and Feeding Heifers, Cows and Bulls for slaughter are in a clean or clipped condition.

FOOD CHAIN INFORMATION

VETERINARY MEDICAL WITHDRAWALS

From 1st January 2010 new legislation comes into force requiring slaughterhouse operators to receive, check and act upon food chain information.

To comply with these new requirements we have modified our movement documents for all classes of stock coming to market to include the necessary declarations on food chain information. This will allow us to pass on this information which must accompany all animals to slaughter and for Store Stock to pass on Medical withdrawal information.

Unless otherwise stated at the time of sale (either by the auctioneer, on the catalogue or the display screens) all livestock are sold as having completed all withdrawal periods for any veterinary medicines they have received. For any animals under treatment the details must be completed in the movement declaration form. It is the responsibility of the buyer to ensure that any animal destined for the food chain are outwith any withdrawal periods.

New Livestock keepers:

Requirement to register with your Animal Health Office.

New keepers of the main livestock species (cattle, sheep, goats, pigs) are required to register their herds and flocks, and the “holdings” they are kept on, under EU Directives. This applies to any number of animals, including individual “pets”.
