Sale Ring 3 at 11.00am Ewes with Lambs at Foot
Store Hoggs

TERMS OF SALE - CASH

ANM GROUP HEALTH AND SAFETY RULES

NOTICE TO ALL VISITORS AND TRADERS.

All visitors and traders on site will be responsible for ensuring that they and their employees or sub-contractors engaged by them comply with all legal requirements, including the Health and Safety at Work etc., Act 1974, The Management of Health and Safety at Work Regulations, The Provision and Use of Work Equipment Regulations , etc.

All visitors and traders will be responsible for ensuring that their operations in no way affect the integrity of the company or its fire, safety or security arrangements and in no way compromise the health, safety and welfare of other visitors to and or employees of ANM Group.

After reversing into the loading banks before exiting their vehicle to unload/load livestock at ANM Group Livestock Marts, Hauliers, Farmers, Exhibitors must follow the "Safe Stop Procedure" -

- 1) Engage handbrake
- 2) Controls in neutral
- 3) Switch off engine
- 4) Remove key

Refer to the ANM Transport Management Plan posted in the Mart Office within Thainstone Centre.

When loading or unloading livestock hauliers, farmers and exhibitors will be responsible for unloading/loading of their livestock in/out of their float/trailer. ***ANM Group Livestock Handlers will not be permitted to enter the loading bank pens until the livestock are placed in the pen and gates closed the livestock is secure in the loading bank pen.***

Vendors must inform ANM Group of any livestock due to attend the market whose temperament, behaviour or condition may call for additional precautions for its safe handling.

In the case of bulls , during the period when show and sale is open to visitors, bulls in pens must not be left unattended. If the vendor is temporarily absent , arrangements should be made with another vendor, steward or member of ANM Group staff to oversee the bull until the handler returns.

Visitors and Traders enter the Livestock areas at their own risk, this area has been assessed as a high-risk area where inexperienced persons have a higher risk of harm. Please cooperate with the ANM Group Livestock team by leaving the area when the Livestock Sale commences.

Traders should ensure that livestock handlers/exhibitors are fit, experienced in livestock handling and familiar with the livestock in their charge.

Children must not be permitted in any area where they may be at risk from livestock or machinery.

Handling of Livestock at shows and sales: ANM Group recommend that an adult person should accompany any junior person during the showing/sale of livestock in the ring and reserves the right to intervene at any point if, in the company's opinion, the person showing the livestock is at risk in undertaking the activity.

All portable electrical equipment supplied and /or used by visitors and traders must be safe and fit for purpose and should have a valid portable appliance test certificate (hair dryers and other equipment).

Passageways must be kept clear at all times during the auction sale.

PLEASE DO NOT STAND IN THE SALE RING ENTRANCE AND EXIT PASSAGES.

The auction ring man escapes and refuges must be kept clear at all times.

E & OE

OVINE PULMONARY ADENOCARCINOMA (OPA)

ADVICE FOR FARMERS

OPA is a lung cancer in sheep caused by a virus, Jaagsiekte sheep retrovirus. OPA tumours may develop in as little as 4-9 months and the disease is always fatal.

The virus is spread between sheep by the respiratory route and also via colostrum and milk.

Warning signs of OPA?

- Unexplained loss of condition
- Breathing difficulty
- Evidence of excessive fluid from the nose when the head is down (half cup full, usually clear, sometimes foamy, often has a consistency similar to washing-up liquid)
- Cases of pneumonia that don't respond to antibiotic treatment (or improve but then deteriorate several weeks later)
- Deaths, particularly at times of stress such as bad weather, lambing time etc.

Actions to take?

- Veterinary investigation to confirm the cause of illness or death.

Options if OPA is confirmed:

- Minimise close contact - e.g. housing, feeding troughs.
- Test-and-cull - currently ultrasound scanning is the best method to identify OPA as early as possible. Discuss this with your vet to weigh up advantages and limitations of the technique. Your vet may advise sheep with inconclusive scans to be isolated and re-scanned six weeks later.
- Cull sheep identified with signs of OPA at scanning immediately - OPA cases will always die and meanwhile they can transmit virus to other sheep in the flock.
- Cull lambs of OPA affected ewes - The lambs are very likely to have been infected with virus and may develop OPA.
- Isolate purchased rams and scan every three months.
- Replacement of whole flock - Re-establishing a flock risks introducing other diseases, or re-introducing OPA - take veterinary advice.

SHEEP SCAB

Have you got all the facts you need to protect your flock?

Sheep scab, caused by infestation of the skin with the scab mite costs the UK sheep industry >£80M per year.

Mites resistant to the ML injectables have been found in Scotland so correct diagnosis is crucial to give the correct treatment, at the right time and to all animals not just those showing signs

Sheep scab mite

What are signs of sheep scab?

- Scab is characterised by yellow scabs, restlessness, scratching, loss of wool and loss of condition

How is it spread?

- Scab is spread by direct contact with infested animals, but as the mite can live off-host for 16-19 days, scab can be spread via fence posts, handling equipment, trailers and shearing equipment

If you suspect your flock has scab, you **must** report it to APHA and **should** seek advice from your vet on controls.

Treatments

- A blood test is available for sheep scab and can diagnose the disease before clinical signs appear, reducing the spread
- OP dipping is an effective means of controlling scab and also kills mites resistant to the MLs but must only be used as a plunge dip

Never allow dip to enter a watercourse and ensure you have a permit from SEPA prior to disposal of waste dip to land.

More information can be found at: <https://www.scops.org.uk/external-parasites/scab/>

FORTHCOMING SALES

APRIL 2026
